

Index

A

- α -amylase, 94
- A/O (Anaerobic/Oxic) process, 505-6
- Abzymes, 34
- Acetone-butanol production, 521-24
- Actin filaments, 22, 387
- Actinomycetes, 17
- Activated-sludge processes, 491-95
 - bulk sludge, 492
 - contact stabilization, 492-93
 - shock loading, 492
 - step feed process, 492
- Active immobilization cells, 263-65
 - adsorption of cells on inert support surfaces, 265
 - encapsulation, 265
 - gelation of polymers, 264
 - ion-exchange gelation, 264
 - macroscopic membrane-based reactors, use of, 265
 - polycondensation, 264
 - polymerization, 264
 - precipitation of polymers, 264
- Active site:
 - enzymes, 59
- Active transport, 125
- Additions, 241
- Adenine, 41
- Adsorption, 351-55
 - of cells, 265
 - of enzymes, 80
 - of solutes, 353-54
- Adsorption capacity, 265-66
- Adsorption chromatography (ADC), 366-67
- Adsorption zone, 353-54
 - breakdown curve of, 354
- Advanced waste-water treatment systems, 501-8
- Aerobic cells, 11-12, 53
- Aerobic fermentations, 320-21
- Aerobic glucose metabolism, control sites, 142-43
- Aerobic organisms, 11-12
- Aerobic processes, 524-33
 - bakers' yeast production, 526-27
 - citric acid production, 524-26
 - high-fructose corn syrup (HFCS) production, 530-33
 - penicillin production, 527-30
- Aerobic respiration, 152
- Aerotaxis, 127
- Affinity chromatography (AFC), 366-67, 370-71
- Aggregates, suspension culture, 410
