

- Genetically engineered organisms (*continued*)
 - genetic processes, regulatory constraints on, 451-52
 - host-vector interactions, predicting, 441-50
 - host-vector system selection guidelines, 424-33
 - comparison of strategies, 432-33
 - Escherichia coli* (*E. coli*), 424-26
 - gram-positive bacteria, 426-27
 - insect cell-baculovirus system, 429-30
 - lower eucaryotic cells, 427-28
 - mammalian cells, 428-29
 - transgenic animals, 430-43
 - transgenic plants and plant cell culture, 432
 - metabolic engineering, 452-55
 - nonprotein products, 421-23
 - plasmid design, and avoidance of process
 - problems, 438-41
 - protein engineering, 456-57
 - protein products, 421-22
 - Genome, 107
 - defined, 236
 - Genomics, 236-41, 241
 - computational techniques, 240-41
 - defined, 236
 - experimental techniques, 237-40
 - functional, 236
 - Genotype, 241
 - Genus, 12
 - Geometric similarity, 298
 - Giberellins, 409
 - Glucoamylase, 94
 - Glucocoeogenesis, 146-47
 - Glucose effect, 120
 - Glucose isomerase, 95, 97
 - Glucose metabolism, 137-41
 - Glucose oxidase, 94, 96, 97
 - Glutaraldehyde, cross-linking by, 266
 - Glutaraldehyde treatment, 80, 95
 - Glycogen, 38
 - Glycolysis, 137-38, 143, 152
 - Glycosylation, 21, 117
 - Glyoxysomes, 21, 386
 - Golgi body, 21, 386
 - Golgi *cis* face, 117
 - Golgi *trans* face, 117
 - Good laboratory practices (GLP), 9
 - Good manufacturing practice (GMP), 9
 - Gram, Hans Christian, 15
 - Gram-negative cells, 16, 53
 - schematic of, 16
 - Gram-positive bacteria, 426-27
 - and host-vector system selection guidelines, 426-27
 - Gram-positive cells, 16, 53
 - Group translocation, 125
 - "Grow-through" tests, 322
 - Growth-associated microbial products, 166
 - Growth factors, 51, 54, 128
 - Growth media, 52
 - Growth-rate-dominated (growth-rate-dependent)
 - instability, 437, 458
 - Growth-rate ratio of plasmid-free or altered cells to plasmid-containing unaltered cells, 433-34
 - Growth yield coefficient, 207-8
 - GTP (guanosine triphosphate), 41
 - Guanine, 41
- ## H
- Hagen-Poiseuille equation, 361
 - Hairy roots, 416
 - Haldane, J. B. S., 62
 - Halobacteria, 19, 51
 - Ham's F12, 394
 - Hanes-Woolf plot, 65-66, 74
 - Haploid cells, 20
 - Heat dissipation, and cell disruption, 341
 - Heat shock regulon, 121
 - Heatley, Norman, 4
 - Helical structure, 30
 - Hematopoiesis, 472
 - Hemicellulases, 95
 - Hemocytometer, 156
 - Hemoglobin:
 - as conjugated protein, 28
 - subunits, 30-31
 - Henri, V.C.R., 60-61
 - Heterotrophic growth, 150
 - Heterotrophs, 49
 - Hexose-monophosphate pathway (HMP), 145, 152
 - High-copy-number plasmids, 434
 - High-energy phosphate bonds, 53
 - High-fructose corn syrup (HFCS) production, 530-33
 - High-pressure liquid chromatography (HPLC), 366-67
 - Hindered settling, 336, 338
