

Interactions in mixed cultures (*continued*)
 parasitism, 476, 479
 predation, 479
 protooperation, 476-78
 symbiosis, 476, 478
 Interferon, 401
 Interleukines, 401
 Intermediate filaments, 22, 387
 Internal gene transfer, 230
 Internal mechanical agitation, reactors with, 286, 323
 Interphase, eucaryote cell division, 20
 Intracellular components of cells, 158-60
 Intracellular enzymes, 92
 Intracellular organelle, 26
 Intracellular spores, 17
 Intrinsic concentrations, 184-85
 Introns, 112, 232
 Invertase, 94
 Ion-exchange chromatography (IEC), 366-67
 Ion-exchange gelation, 264
 Ion-exchange membranes (IEM), 376
 Iron (Fe), 51
 Isoelectric focusing, 376
 Isoelectric point, 28, 239
 Isoelectric precipitation, 350-51
 Isozymes, 57, 123-24

K

Key biopharmaceutical products, 423
 "Killed" virus, 315
 Kinetics of death, 314-15
 Koji process, in SSF system, 276
 Krebs, 137

L

L-amino acids, 28
 Lactases, 95, 120
 Lactic acid production, 519-21
 Lactose, 36, 120
 Lagging strand, 109
 Langmuir-Hinshelwood kinetics, 60, 176
 Leading strand, 109
 Ligand, 235
 Ligands, 51
 Light phase, photosynthesis, 151-52
 Lignases, 94
 Lineweaver-Burk plot, 64

Lipases, 94, 97
 and koji fermenter, 277
 Lipids, 38, 38-39, 54
 Lipoic acid, 51
 Liquid extraction, 343-48
 centrifugal Podbielniak extractors, 345, 347
 defined, 343
 dissociation extraction, 346
 Liquid-liquid partition chromatography (LLC), 366-67
 Liquids, sterilization of, 315-20
 Logistic equations, 180-82
 Loop reactors, 286, 323
 Lotka-Volterra model, 482-85
 Low-copy-number plasmids, 434
 Lower eucaryotic cells, and host-vector system selection guidelines, 427-28
 Luedeking-Piret equation, 168, 394
 Lumenal phase, of membranes of the endoplasmic reticulum (ER), 386
 Lysogenic cell, 227
 Lysogenic cycle, 14
 Lysosomes, 21, 386
 Lysozymes, 95-96, 343
 Lytic cycle, 14

M

M phase, eucaryote cell division, 20
 Macronutrients, 48, 49-50, 54
 Macroscopic membrane-based reactors, use, 265
 Magnesium, 50
 Maintenance coefficient, 165
 Maintenance energy, 164
 Mammalian cells, and host-vector system selection guidelines, 428-29
 Manganese, 51
 Manufacturing cost, and process efficiency, 422
 Mats, 416
 Membrane-based reactors, 472
 Membrane cartridge unit, 322
 Membrane entrapment of enzymes, 80-83
 Menten, M. L., 60-61
 Mercapto, 51
 Merck, 5, 7
 Mesophiles, 11
 Messenger RNA (*m*-RNA), 46
 Metabolic burden, 437
 Metabolic control theory, 455
 Metabolic engineering, 133, 452-55
