

Mixed-liquor volatile suspended solids (MLVSS), 490  
 Mixotrophic cultures, 416  
 Molds, 22-24  
 Molecular biology, 105  
 Molecular oxygen, 49  
 Molybdenum (Mo), 51  
 Monoclonal antibodies (MAbs), 371, 400-401  
 Monod equation, 176-77  
 Monod kinetics, 246  
 Monosaccharides, 34-36  
 Moromi, 276  
 Mortal cell lines, 389  
 Moser equation, 177  
 Moving-bed columns, analysis of adsorption phenomena in, 351-52  
*m*-RNA, 46, 232, 237  
*m*-RNA splicing, 112  
 Multimembrane bioreactor, 380  
 Multimerization, 441  
 Multimers, 434  
 Multistage chemostat systems, 250-56  
 Mutagens, 221, 241  
 Mutants, kinds of, 224  
 Mutation, 219-25  
   auxotrophic mutants, 222  
   conditional mutants, 225  
   defined, 219  
   desirable mutants, selecting, 220-25  
   mutagens, 221  
   replicate plating, 222-25  
   selectable, 222  
   spontaneous rates of, 221  
   unselectable, 222  
 Mutualism, 476-78  
 Mycelium, 22-23

## N

N-linked glycosylation, 117-19, 432  
 Naming convention, enzymes, 57  
 Necrosis, 399  
 Nephelometry, 157-58  
 Neutralism, 477  
 Nickel, 51  
 Nicotinamide adenine dinucleotide (NAD), 43, 136  
 Nicotinamide adenine dinucleotide phosphate (NADP), 43, 136  
 Nitrification, 501-4  
 Nitrogen, 49

Nitrogen fixation, 144  
 Nitrogenous compounds, metabolism, 143-44  
 Nomenclature, 12  
 Nonanchorage-dependent cells, 388  
 Nongrowth-associated microbial products, 166-67  
 Nonoccluded virus (NOV), 429  
 Nonsense codons, 113  
 Northern Regional Research Laboratory, 5  
 Nuclear magnetic resonance (NMR), 310-11  
 Nuclear pores, 387  
 Nucleic acids, 40-43  
 Nucleoli, 387  
 Nucleoside triphosphates, 107-8  
 Nucleotides, 41  
 Nucleus, animal cell, 387

## O

Okazaki fragments, 109  
 Oleic acid, 51  
 On-line HPLC, 310  
 Operon, 119  
 Optical density measurement of culture medium, 158  
 ORFS (opening reading frames), 240  
 Organ cultures, advantages/disadvantages of, 416  
 Organized tissues, bioreactors for, 414-17  
 Orientation effect, enzymes, 59  
 Origins of replication, 438  
 Osmotic pressure, 356  
 Osmotic shock, 342  
 Outer membrane, gram-negative cells, 16  
 Oxidation ponds, 499  
 Oxidative phosphorylation, 141  
 Oxygen, 49  
 Oxygen solubility, 293  
 Oxygen transfer rate (OTR), 172  
 Oxygen uptake rate (OUR), 172

## P

*p*-amino benzoic acid, 51  
 Packed-bed columns, analysis of adsorption phenomena in, 351-52  
 Packed cell volume, 158  
 Paclitaxel, 406  
 Papain, 94  
 Par locus, 440  
 Paramecium, 22  
 Parasitism, 476, 479  
 Particle counters, 157
